New York, NY – July , 2017...When the creators of **Sticko** decided to take on the challenge of designing this little gadget, they had every intention of developing a better “mouse trap”– not literally of course. They wanted to make a multi-functional mount that combined innovation and design in one small package, and they took the idea to Kickstarter, becoming one of the most successful campaigns to launch.

That was last February - today **Sticko** is making its market debut. This perfect little gadget uses small suction cups that attach to a variety of surfaces – and can easily convert from a cell phone mount to a variety of other handy uses: it is excellent for hanging kitchen towels, car and house keys, and even your television remote (s). In the bathroom, it turns any shampoo, conditioner, or body scrub container into a hands free dispenser.

This little gadget is ultra-durable, super simple, multi-purpose, and is made of UV protected, long lasting materials that perform up to the task whether in the heat of summer or the cold of winter.

**Sticko** is portable- easy to carry in your pocket or pocket book.

**Sticko** is simple- just adjust one set of suction cups to the back of any surface.

**Sticko** is chic- designed in a variety of colors to fit your individual style and taste.
